

Investment Objectives

The AB SRI Balanced Income Model Portfolio will seek to deliver longterm capital growth by blending collective strategies and employing our proprietary rating and risk profiling systems. The equity allocation of the portfolio will be managed within our self imposed parameter of 40% - 85% and in line with a Alpha Beta Risk Profile of 4 - 6.

The AB SRI Balanced Income Portfolio only invests in funds that are sustainable and contribute positively to either the environment or society. The model selects investments that provide solutions to global issues such as climate change, biodiversity, water shortage, urbanisation, health and well-being, and social inclusion. The United Nation's Sustainable Development Goals are utilised to inform analysis and research on these themes, and the holdings in the model.

Manager's Commentary

In the first quarter of 2024, we witnessed positive outcomes in our portfolio's performance.

Some important milestones included the Bank of Japan raised interest rates for the first time in 37 years, while the Swiss National Bank initiated an interest rate cutting cycle with a 0.25% decrease. Inflation in the United States surprised on the downside, pleasing domestic markets, though core inflation remained steady, particularly due to persistent housing costs.

The Federal Reserve indicated a likelihood of three rate cuts in 2024 but uncertainty regarding further easing in 2025. The promise of lower interest rates, coupled with an impending Presidential election, boosted optimism in US markets. Solid economic growth, a robust labour market, and optimistic consumer confidence further fuelled this positivity. Moreover, ample liquidity supported risk assets, acting as a vital lubricant for portfolio growth.

Chinese equities and emerging markets remained stable. Copper prices and commodities in general were supported by increased Chinese demand, indicating manufacturing demand. However, deflation in China is a real phenomenon and is finding its way into Western markets, supported by a weaker Yuan.

In Europe, the European Central Bank faced pressure to cut interest rates to alleviate the burden on struggling Eurozone economies. ECB has indicated it may front run the Fed to cut interest rates. In the UK we were all pleased to see inflation falling back and offering an overdue positive surprise. Meanwhile, geopolitical tensions persisted, with conflicts in the Middle East and the Russo-Ukraine crisis causing instability.

Despite potential geopolitical risks, the outlook remained optimistic. A regenerative interest rate cutting cycle across developed markets, robust economic performance in the US, and resilient corporate earnings suggested further upside potential. Alpha Beta Partners maintained a cautious risk-on positioning in portfolios, aiming to capture opportunities while remaining cognizant of the potential downside risks.

At portfolio level, the SRI Balanced Income model benefited from its UK equity exposure, with its best performing fund being the Janus Henderson UK Responsible Income fund. One of the fund's biggest holdings is RELX, a global provider of information-based analytics and decision tools. RELX aims to benefit society by developing products that help researchers advance scientific knowledge, enable doctors and nurses to improve the lives of patients, and support lawyers to uphold the rule of law and achieve justice. Their products also aim to empower businesses and governments to prevent fraud and to assist consumers to access financial services and get fair prices on insurance.
