WHY ALPHA BETA... RIGHT SOLUTIONS... RIGHT TIME

- It is a tangible benefit to financial advisers both at customer and regulator level to know that the risk within a portfolio will not drift beyond what he/she has agreed with his/her client. The proprietary “*Risk First*” process underwrites this key point for advisers. Deploying state of the art systems and being risk focused provides this benefit.
- Deploying proven institutional management techniques and supporting systems enables us to deliver forward looking asset allocation methodologies and to constantly appraise performance to ensure we deliver or surpass the target return objective, always within the allocated risk budget.
- Alpha Beta works consultatively with clients to create investment propositions which match specific requirements across both accumulation and decumulation environments. We work with leading academics in Cass Business School to devise appropriate modern solutions.
- Active management of Passive and Active solutions - asset allocation is the evidence based driver of 90%+ of total returns. Alpha Beta sits in the sweet spot between the passive players and active funds. We provide strong and consistent risk adjusted returns and enhance customer outcomes.
